ERD for Travel Consulting Company

Assumptions:

- A team handles one region at a time. Re-assigning a team updates its region assignment and past assignments aren't stored
- Each region has one geography and one travel type
- A consultant can belong to more than one team
- Each call is taken by one consultant
- Monthly statistics are calculated from call data, not stored

ERD For DVD Rental Company

Assumptions

- Each branch has exactly one manager at a time, and a manager is a staff member.
- A manager manages the branch where they work.
- A staff member works at one branch at a time.
- A member can register at several branches.
- The registration date is stored per branch.
- A member rents DVDs from branches where they are registered. Limit of ten is a business rule.
- Each DVD copy belongs to one branch and one movie. Each movie has one category.
- The daily rental cost is stored on each rental record.
- Member name and DVD title on a rental come from the member and movie tables
